

P17947.A10

a transmitter that transmits image data to a designated destination address which is stored in the address book, the image data being transmitted via at least one of the network or a telephone network;

Disc
a communicator that transmits the address book to the terminal apparatus when a request for the address book is received from the terminal apparatus, the address book being displayable at the terminal apparatus; and

b1
a controller that, in response to an instruction from the terminal apparatus, transmits at least one input screen, associated with the address book, to the terminal apparatus, said input screen having an input field enabling modification of a destination address, said screen configured so that the address book can be modified from the terminal apparatus.

21. (Clean Copy) The communication apparatus according to claim 20, wherein said controller deletes a designated destination address in the address book, in accordance with an instruction from the terminal apparatus.

22. (Clean Copy) The communication apparatus according to claim 20, wherein said controller adds a destination address into the address book, in accordance with an instruction from the terminal apparatus.

23. (Clean Copy) The communication apparatus according to claim 20, wherein said controller edits a designated destination address in the address book, in accordance with an instruction from the terminal apparatus.

P17947.A10

24. (Clean Copy) The communication apparatus according to claim 20, wherein the address book includes telephone numbers as the destination addresses.

27. (Clean Copy) The communication apparatus according to claim 20, said server transmitting the address book and menu items to the terminal apparatus, wherein the address book and the menu items are displayed as single image at the terminal apparatus, the menu items being utilized to change a content of the address book.

39. (Clean Copy) A communication method using a communication apparatus connected to a terminal apparatus via a network, comprising:

storing an address book including a plurality of destination addresses into a memory, the address book being stored as an HTML file;

transmitting image data to a designated destination address stored in the address book, the image data being transmitted via at least one of the network and a telephone network;

transmitting the address book to the terminal apparatus when a request for the address book is received from the terminal apparatus, the address book being displayable at the terminal apparatus; and

controlling, in response to an instruction from the terminal apparatus, transmission of at least one input screen associated with the address book, to the terminal apparatus, the input screen having an input field enabling modification of the destination address, modification of the address book from the terminal apparatus being enabled by the input screen.

P17947.A10

40. (Clean Copy) The communication method according to claim 39, wherein the controlling deletes a designated destination address in the address book, in accordance with an instruction from the terminal apparatus.

46. (Clean Copy) The communication method according to claim 39, further comprising transmitting the address book and menu items, wherein the address book and the menu items are displayed as single image at the terminal apparatus, the menu items being utilized to change a content of the address book.

The following claims are submitted for consideration by the Examiner:

--- 57. (New) The communication apparatus according to claim 20, wherein said controller modifies a designated destination address, in accordance with an instruction from the terminal apparatus.

58. (New) The communication apparatus according to claim 20, further comprising a scanner and a printer.

59. (New) The communication method according to claim 39 further comprising providing a printer and a scanner in the communication apparatus.

REMARKS

Upon entry of the present amendment, claims 20-23 27, 39 and 46 will have been amended, while claims 57-59 will have been submitted for consideration by the Examiner.
